RE: TURF DE-THATCHING

Dear Residents,

Harvest Landscape will begin a de-thatching process next week to improve the health and growth of community turf. The Harvest crew will start with Phase 13, working in descending order to Phase 1 (reverse order.) The crew will use a de-thatching tool which cuts the grass all the way to the dirt, thus separating the thatch from the grass.

Work begins next Monday, September 20th and will continue through October and November. It is expected to take one day to complete three buildings, work hours will be from 8:00 am to 3:00 pm, Monday through Friday.

There will be dirt, debris, and noise during the work hours – please close your doors and windows to prevent noise and dust from entering your Unit.

Your cooperation is appreciated; if you have any questions, please call the Management office at (714) 960-5475.

Thank you,

Management
