‘Tis the Season – Protect Your Property!

Residents are advised to create safety rituals to reduce theft opportunities. Take some time to review and implement the following checklist:

- Lock your vehicle.** Lock doors while driving and upon exiting your vehicle.
- Do not leave keys in your vehicle.**
- Do not leave valuables in vehicles.** This includes items such as purses, laptops, iPods, sunglasses, and loose change. Remove face plates of after-market stereos. If you must transport valuables, place them in the trunk prior to reaching your destination.
- Do not leave garage door opener in plain view;** treat it as a key to your property.
- Call security and 911 to report suspicious persons or activity.** Pay attention to unusual behavior in the community and be especially alert to noises such as breaking glass.
- Close windows when vehicle is parked** and avoid having windows wide open when driving.
- Utilize secure garage parking.** A majority of vehicle-related thefts occur to vehicles parked on streets and driveways.
- Use visible deterrents such as the steering wheel bar,** also called the “Club,” to make a vehicle difficult to steal. If you have an alarm system in your vehicle, use it.
- Do not leave vehicles running unattended.**
- Lock your Unit doors and windows.** Keep valuable items out of sight.
