

Please be aware of scam phone calls going out to community members. There is a “Robo-call” circulating in which an automated recording states they are from Southern California Edison (SCE) and that payment is due to immediately to avoid electricity shut-off.

Please do not give these callers your personal or financial information. SCE does not shut-off electricity after a phone call. If you have questions about your SCE account , please call them directly at 1 (800) 655-4555.

Thank you,
